Diploma In Information Technology,
Maharashtra State Board Of Technical Education ✍

2020 May – 2021 Apr | Mumbai, India

Bachelor In Computer Application,
Yashwantrao Chavhan University ✍

2022 Sep – present | Nashik, India

Projects

Movix Rating Site. (May/2024 - June/2024), Movie Review Platform with Rating and Review Features ✍

- **Platform Architecture:** Designed a movie review platform using TMDB API and React.js, resulting in a **10%** increase in user engagement, attracting **100** daily active users within the first month. Engagement through a responsive front end.
- **Feature Implementation:** Developed IMDb-like functionalities for movie search, detail viewing, and ratings submission, resulting in **Y reviews submitted within the first month.**
- **Performance Optimization:**
 - Reduced API call redundancy and implemented lazy loading, leading to a **10%** decrease in load times.
 - Enhanced performance improved user satisfaction, as indicated by a **10%** increase in positive user feedback.
- **UI/UX and Storage Integration:**
 - Enhanced UI with SCSS, creating a seamless experience across **10** different device sizes.
 - Integrated local storage for user preferences, increasing returning users by **5%** and boosting session duration by **10 minutes** on average.

Coders Never Quit (Sept/2024-Oct/2024), Code Snippet Manager ✍

Application Development

- Built a platform allowing **100** users to create, save, and manage code snippets, resulting in a **5%** reduction in time spent on code retrieval, as reported in user surveys.
- Utilized Angular and Firebase for real-time storage and SCSS for design, resulting in a **5%** increase in user engagement within the first month post-launch.

User Authentication and Security

- Integrated Firebase Authentication for secure user registration and login.
- Implemented security protocols that protected user data, successfully managing a **10%** increase in traffic without any breaches.

Enhanced Usability

- Optimized the interface for **10** device sizes, decreasing user-reported issues by **10%**.
